With 2016/2019 there are a FEW features that are only in Datacenter and not in Standard.. I have one host running the 6/7 free hypervisor I want to build 4 Windows VMs Can I build those VMs as 2019 Standard rather than 2019 DataCenter The reason I am asking is because I see Standard has a 2 VM limit but Im guessing that just refers to Hyper-V.. To be fair, even if you DO live in it every day, it can still be extremely confusing.
